

Julian Riise

Architect and developer in Oslo. I build software for architects.

julianriise@icloud.com · +47 940 82 912 · julianriise.com · github.com/julianriise · linkedin.com/in/julianriise

Master of Architecture, three-time founder and full-stack developer. I write TypeScript and React every day, and autonomous AI agents I set up build, test and ship my software around the clock. Open to new opportunities, and happy to start with a trial.

I outwork everyone. Don't take my word for it:

EXPERIENCE

Forsk / Founder

2026 – now

The Rhino plugin for architects: import a floor plan, generate the 3D model, check daylight and print sheets.

- **Shipped solo, fast.** Took it from first commit to the Rhino plugin store in three weeks, then shipped four releases in its first three days. [See it on food4rhino](#).
- **AI-first, for real.** Set up always-on autonomous AI agents that plan, build, test and ship its features around the clock. The [roadmap](#) and [tickets](#) are public.

Arealize / Architect, Product Development

Sep 2022 – now (furloughed since Sep 2026)

Web software that digitizes and generates floor plans for real estate companies and BIM users. The platform has processed over 40 million m² of floor plans.

- Worked on generative design and on analysis and simulation features.
- Built integrations with customers' CAD and BIM tools.
- Responsible for customer documentation.
- Day to day: frontend design and interaction, smaller backend APIs, QA and product implementation, as the link between architects and developers.

Cornerlab / Co-founder

2021 – 2022

A keyless Airbnb hosting platform with automated contracts for short-term rentals.

Rocket / Founder

2018 – 2021

A social platform for real estate and restaurants, plus media strategy and Instagram automation for mid-sized firms.

Freelance architect / Self-employed

Aug 2017 – Sep 2022

Architecture commissions focused on private homes and technical design. Selected projects in [my portfolio](#): cabins, extensions with outdoor spaces, outbuildings, a pool and a house converted for rental.

AHO / Student mentor · Taught students CAD tools like Rhino and Grasshopper.

Aug 2019 – May 2022

SATS / Customer service agent · Sales and customer service by phone and email.

Jan 2015 – Aug 2016

EDUCATION

The Oslo School of Architecture and Design (AHO) / Master of Architecture

2016 – 2022

Master's thesis on advanced Grasshopper methods. Selected work on youtube.com/@julianriise.

OsloMet / Applied Behaviour Analysis

2013 – 2014

SKILLS

Development	TypeScript, React, Next.js, Python. Frontend design and interaction, backend APIs.
AI	Autonomous agents that build, test and ship software.
Architecture and BIM	Rhino and Grasshopper; AutoCAD and Revit from my studies. Floor plans and technical design.
Languages	Norwegian (native), English (fluent).
Interests	Hackathons and hiking.
